The development of the Ai

The development of the meta-universe

AI

METACOSM

The development of the Ai

- ◆ Ancient myths and legends
- ◆ Craftsmen make artificial people and give them intelligence or consciousness
- ◆ Machine learning is widely used in academia and industry thanks to the application of new methods, powerful computer hardware, and large data sets.
- ◆ Progress has been made in the field of AI, solving problems that were thought impossible and successfully applying them to commercial products.

The four stages of development of the meta-universe

Ancient myths and legends

Craftsmen make artificial people and give them intelligence or consciousness.

Classical philosopher

Attempts to describe human thought processes as mechanical manipulation of symbols.

the 1940s

The invention of programmable digital computers led scientists to explore the possibility of building an electronic brain.

21st century

Machine learning is widely used in academia and industry thanks to the application of new methods, powerful computer hardware, and large data sets.

development direction

The importance of the meta-universe

New incremental value

The meta-universe becomes the gateway to most digital experiences, a key component of all physical experiences.

The evolutionary iteration of the Internet

The Metacosmic era will give birth to new companies, products, and services that restructure the management of everything from payment processing to authentication, content creation.

New distribution mode

In the virtual world, potential workers who choose to live outside the city will be able to participate in the "high-value" economy through virtual labor.

The technological support of the meta-universe

THE TECHNICAL SUPPORT OF THE METACOSM

METACOSM

Income principle

MagicAI is a DeFi super aggregator that uses the Protocol Compound Strategy Protocol (CSP) of DeFI3.0 to complete a series of DeFi transactions, so that the super-fast composite strategy avoids losses caused by token changes. IGTAI is a DeFi super polymerizer that uses the Protocol Compound Strategy Protocol (CSP) of DeFI3.0 to complete a series of DeFi transactions, so that the super-fast composite strategy can avoid losses caused by token changes. At the same time increase compound interest and position leverage to obtain high non-destructive stable returns.

METACOSM

Income principle

The optimal Strategy+DeFi2.0 agreement can be adopted through the following mechanisms:

- Super fast high frequency strategy
- Automatic LP group, automatic high-speed switching of mining pool
- Super fast automatic gun, automatic compound interest, every time the asset will accumulate
- Integrated transactions to minimize GAS
- Target high-yield head mines
- Automatic lever matching
- Compounding Leverage supports high returns

METACOSM

Income principle

Fully decentralized, automatic operation of on-chain protocols, no risk of manipulation, no risk of token ups and downs, no risk of stopping operation, transparent destination of funds, transparent source of income, through the world's first security audit CERTIK audit (CK audit DeFi project has no security problems), no threshold for operation, funds are completely in their own hands

Deposit stablecoins to earn stablecoins, will not bring any losses, there is no risk of ups and downs, continue to obtain the highest stable and non-destructive returns in the industry, and maintain more than 200% APY in three years!

mechanism

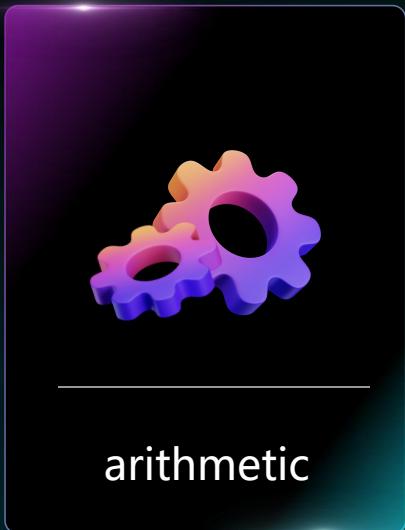

METACOSM

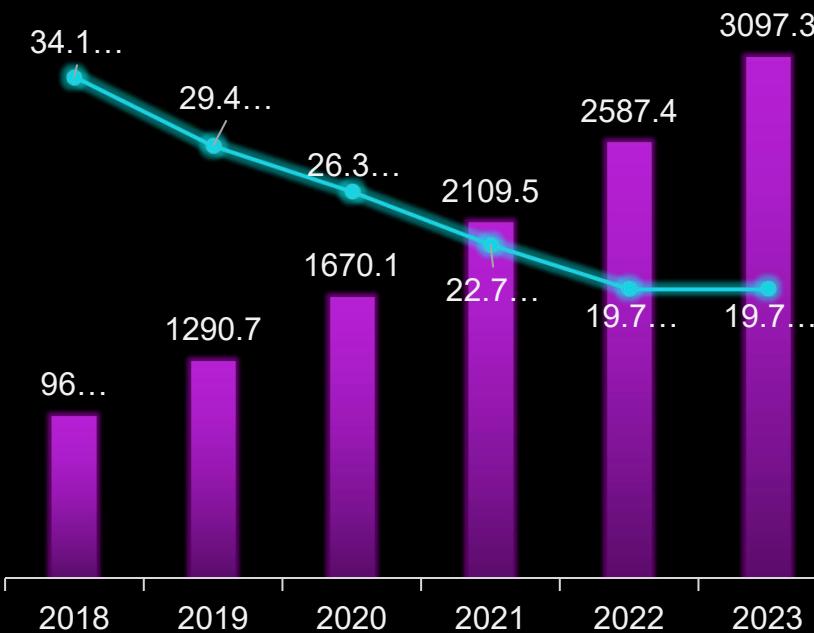

arithmetical technique

The operation depends largely on two

- ◆ factors, one is the hardware (chip), and the other is the way the algorithm or the operation is done.
- ◆ The way meta-universe computing works relies heavily on cloud computing
- ◆ Because the display equipment should not be too large, which determines that the display equipment is difficult to bear the calculation required by the meta-universe alone, at this time cloud computing comes in handy.

Strong market capitalization management team

The market value management team also needs to pay close attention to the company's financial situation, performance and market dynamics.

industry scale

2109.5 billion

rate of increase
26.3%

Data show that the cloud computing industry scale can exceed 300 billion yuan in 2023. The development of cloud computing industry can provide a good computing power foundation for the development of the meta-universe.

Visual interaction technology

Back-end presentation technical support

AR/MR/VR

Random interaction

digital media

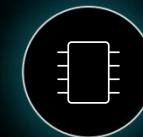

3D modeling

real-time rendering

MagicAI is led by NDAX, Jaxx, Newton, and Foundation layer 1 to bring together a group of cryptocurrency enthusiasts, consisting of developers, designers, and digital marketers with collective experience in the cryptocurrency space. The team has experience with Meme projects, exchanges, public chain projects, P2E projects, and more concept-based projects. The team will work to create a user-friendly platform where users can easily earn profits through MagicAI.

METACOSM

Professional technical team

We are a highly professional team whose experience and skills are well known in the industry

Our team has excellent professionalism and rich project experience, and they are able to provide first-class service

Our team members are very professional and take their work very seriously

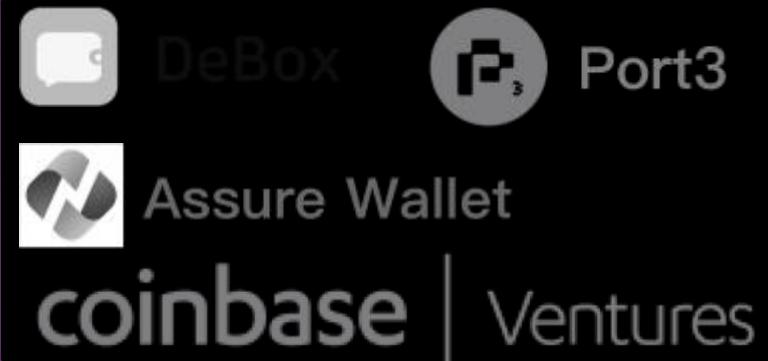

METACOSM

authentication mechanism

METACOSM

supporting agency

Token allocation

Token name ♦ MagicDragon

Token issue ♦ 1 billion was eventually destroyed to 21 million

Token allocation ♦ 10% development and ecological applications

7.9% node to shareholders

52.1% financial airdrop

30% bottom pool added

Transaction and transfer fees ♦ 4.9%

Transaction fee allocation ♦ node dividend 1%, LP added weighting 1%, destruction 2%, Marketing: 0.9%

The gift is allocated to the airdrop according to the wealth management income, and the daily withdrawal is released according to 0.5% of the total amount owned after the airdrop

business model

METACOSM

business model

Experiences and forms of interaction will become more immersive

Spawned a new marketing direction into the mainstream

The volume of VR market has reached a higher level

METACOSM

Benefit accompanied by risk

Because the meta-universe industry is still in the early stage of development, relevant policies are not clear, and legislative supervision is still blank. When virtual currency such as NFT brings certain economic benefits, it will also be accompanied by certain economic risks, and economic risks may be transmitted from the virtual world to the real world.

Magic node level	Private placement nodal amount	NFT identity gift	AI financial management level	Mystery gift giving	Token giveaway	Global dividend	Token commission dividend
primaryNode	500USDT	primary	V1	A luxury watch	5000Token	1%	10%
intermediateNode	1000USDT	intermediateNFT	V2	A luxury watch	1Token	2%	20%
Senior Node	3000USDT	Senior NFT	V3	Rolex	30,000 tokens	3%	30%
Super Node	10000USDT	advanced NFT	V5	Rolex	100,000 tokens	5%	40%

Benefit accompanied by risk

One Static: 100USDT starting investment (10USDT investment can be experienced; A valid account is deemed to be more than 100 oil)

Day/date	3Day	7Day	15Day	30Day	90Day	180Day
re/Day	0.8%	1%	1.2%	1.4%	1.7%	2%

Two Referral reward: 15% in one generation, 10% in the second

Three Team reward: 10%--50% of the static revenue under the umbrella

4. After maturity, all principal and profit can be reinvested directly within the platform. May withdraw cash; Manual retry is required
5. automatic reinvestment switch, switch on the financial maturity of the profit and principal all automatic reinvestment, switch off the principal and profit to the total amount, can be withdrawn and manual investment.

Magic organizes tokens for DAO, and tokens have the platform's development voting and decision-making rights and the right to distribute dividends

METACOSM

Interest model

Level	Direct number of people	Fixed capital	District performance (total excluding regions)	earnings	Subsidy (only once for the same level)	Parallel grade
V1	3	300U	2000U	10%	100	10%
V2	5	1000U	10000U	15%	300	
V3	7	3000U	30000U	20%	1000	
V4	9	5000U	100000U	25%	2000	
V5	11	10000U	300000U	30%	5000	
V6	11	30000U	1 millionU	40%	20000	
V7	11	50000U	2 millionU	50%	30000	

THANKS
